MWL07B Air Line Lubricator

- Features wide throat filler for easy top filling with either rock drill oil or grease
- Replaceable pipe bushings provide longer life by preserving larger threads
- Heavy duty malleable steel casting pressure tested to 1,200 PSI
- Easily adjustable flow rates of low flow, medium flow, and high flow
- Features a safety vent hole to allow entrapped air to escape when removing the filler cap to ensure the lubricator is never opened while pressurized
- Sipper nozzle is weighted to ensure the intake is always at the deepest position no matter what position the lubricator is in
- Maximum working pressure of 250 PSI, maximum volume of 75-450 CFM
- Oil or grease capacity: 1.5 pints
- Weight: 11.5 pounds
- Pipe thread size: 1-1/4"
- Bushing size: 1-1/4" x 1", 1-1/4" x 3/4"
